Lloyd George, suffering from a septic abscess of the face and so ill that he cannot see many visitors, is given credit for forcing the Irish President to give ground through the rapid exchange of messages between them.

British officials were surprised at the rapidity of the exchange of telegrams, and in some quarters it was likened to the speedy series of communications between former President Wilson and German spokesmen which led to peace.

Americans Who Bought

NEW YORK, Sept. 17.—The colbelow I cent for the first time in financial history, has caused a loss of millions of dollars to American investors and speculators in the mark as well as other continental

German Currency.

The exact amount of this loss is difficult even to approximate, for marks have been sold in this coun-try as well as in all other countries, in every conceivable unames, and through hundreds of channels.

The guess of one banker is that no less than \$100,000,000 worth of marks has been disposed of in the United States since the armitties and that the average price paid for these marks was 2½ cents. On that these marks was 21/2 cents. On that basis, and at the present quotation, approximately 60 cents of every American dollar put into marks has

been lost Another banker cuts the estimate in half, and says that irrespective of the professional sales by banks ers incident to reparations settle-ments, about \$50,000,000 have been invested here in German exchange. New York appeared to be the cen-ter of mark distribution. Small stores recently sprang up on prominent corners where the German paper currency was sold to the ex-tent of thousands of marks. Fed-dlers also hawked the paper marks about the streets, selling from one mark up. One enterprising distributer sent a large crew of can-vassers to call from door to door.
